### Methodology

Game Score™ is based on Ookla's consumer initiated Speedtest results as well as Consumer QoE™ latency and jitter measurements taken to real world game servers. Game Scores are composed of eight components, each measuring a different aspect of consumer gaming experience. Each of these components is evaluated and scored on a scale of 0-100 for each provider. Finally, scored components are combined in a weighted average to produce a Game Score for each eligible provider.

Game Score Components:  
 Latency: 50%  
 Jitter: 20%  
 Download Speed: 20%  
 Upload Speed: 10%
